A propos de moi

A propos

As a skilled engineer and entrepreneur, I've assisted governments and Fortune 500 companies

around the world in understanding and delivering secure, high-reliability computing and electronic information systems. My current focus is on the design, implementation and deployment of rapid and cost effective automated sensor data capture and analytics solutions for Industrial IoT, Industry4.0/5.0 and Digital Transformation projects; specializing in secure 'edge-to-anywhere' electronic transaction processing for cloud and big data solutions.
